

Dear relation,

Beside our report about the peanut market, Aldebaran also would like to keep you informed about the sunflower market. The sunflower trade of Aldebaran has grown strongly these recent years. From now on, we shall send our vision of the sunflower market with information about the market and prices. This way, you will be kept up to date.

New crop

At the moment, there are a lot of speculations about the quality of the new crop and prices. However, the main thing is that it is too early to give a forecast about the new crop. Right now, it is typical spring in Eastern Europe as the rain levels are at the average levels for the season. During the summer there will be more information about the growth of the new crop.

Current market

The price expectation for current bakery kernels and in-shells is expected to increase during the summer. This until the new crop has arrived. There may be some quantities left for storage, but be careful to check the quality that has been stored.
